

I am writing on behalf of the Airl radio station in my community. I am from Las Vegas, NV and while most believe it is only Sin City, it is not. The Las Vegas Strip is a long way from my home however I do know that the sin can and will find its way away from the strip. Airl is the main radio station that my family and I listen to every morning and evening when traveling in the car. Losing this station would leave us to listen to the stations that I feel are just not appropriate for my eight and five year old. These other radio stations constantly talk about subjects that are not age appropriate for many of the listeners. They are using fowl language, talk about sex, drinking, and other subjects that are not suitable for my family. We of course will choose not to listen to the radio stations and will have to bring tapes and cds in the car to listen to. I believe Airl is needed in our community because there is enough of the inappropriate "stuff" in our city. Let us have & keep the one decent station on the radio. In a town called Sin City we want as many sinless things we can have. Please leave Airl on the radio, it is our light in the darkness.
